

Next Due Date Calculation

Due date calculator

```

class PayDateCalculator {
/**
 * This method determines the first available due date following the funding of a
 loan.
 * The payday will be at least 10 days in the future from the fundDay. The
 * due date will fall on a day that is a pay date based on their pay date model
 * specified by 'paySpan' unless the date must be adjusted forward to miss a
 * weekend or backward to miss a holiday
 *
 * @param fundDay: Date - The day the loan was funded.
 * @param holidays: Date[] - An array of dates containing holidays
 * @param paySpan: - A string representing the frequency at which the customer is
 paid. (One these values: weekly, bi-weekly, monthly)
 * @param payDay: payDay - A date containing one of the customers paydays
 * @param hasDirectDeposit: boolean - A boolean determining whether or not the
 customer receives their paycheck via direct deposit.
 */
 public calculateDueDate(fundDay: Date, holidays: Date[], paySpan: string,
   payDay: Date, hasDirectDeposit: boolean): Date {
   return dueDate;
 }
}
    
```
